ABOUT ME

22-year-old tech enthusiast specializing in electrical engineering and control systems. Known for my hard-working nature and creative conceptualization, thrive in building automated solutions, from IoT monitoring to advanced hardware integrations.

Education

2023 - 2026 | Politeknik Negeri Semarang | D3 - Electronics Engineering
2020 - 2023 | SMK Bina Nusantara Ungaran | Computer Network Engineering

Experience

Internship
PT.RuangIndustri Indonesia (2025-2026)
Participated in the assembly and wiring process of Manually Guided Vehicle (MGV) robot components. Responsible for troubleshooting sensors and electronic circuits to ensure robot functionality, and collaborated with the technical team during control system testing and calibration.

Internship
Subdistrict Wringin Putih (2021-2022)
Performing administrative tasks, providing public services, and assisting with daily office operations. Primary activities include data input, managing population documents (KTP, KK, and birth certificates), assisting with public services, compiling activity reports, and assisting with sub-district-level events.

Freelance
PT.SIGMA GLOBAL INNOVATION (2026)
Responsible for the assembly and wiring of electrical panel components for automation machinery performs troubleshooting on sensors and electronic circuits to ensure equipment functionality, and collaborates with the technical team on the testing and calibration of control systems.

Freelance
PT.Macroprima Panganutama (Cimory) (2023)
Work experience as a Production Operator, focusing on the preparation and blending of seasoning formulations. Possesses strong expertise in precise material weighing and maintaining formula accuracy to ensure consistent product flavor. Highly disciplined regarding industry standards for sanitation and food safety.

Competition Experience

IYSA : INDONESIA INTERNATIONAL INVENTION EXPO (IIIEX) 2025. **“Smart Tomato Sorting and Display System Using Yolov8 and IoT Based Rack Monitoring”**

Skills

Technical Skills : High & Low Voltage Electrical Panels, Cad Designer (Autodesk Inventor) Arduino IDE Programming, Microsoft office, Internet Networking

Soft Skills : Adaptability and problem Solving, Responsible and disciplined,
Able to work independently and collaboratively, self-confident, Fleksible, Fast Learner.
